

HW04 – Automation Testing

Bug Report

Student ID: 23127325
Project: Testing_Homework4
Automation Framework: Playwright

1. Bug Report Summary

Bug ID	Feature	Test Case	Description	Severity	Status	Issue
BUG-FR03-001	FR-03	TC-FR03-B001	OTP length validation does not enforce 6 digits.	High	Open	#4
BUG-FR03-002	FR-03	TC-FR03-B002	Confirm-password input is missing.	Medium	Open	#2
BUG-FR03-003	FR-03	TC-FR03-B003	Valid password Password1! is rejected.	High	Open	#3
BUG-FR03-004	FR-03	TC-FR03-B004	Expired reset token is not rejected.	High	Open	#1

BUG-FR03-001 — OTP Length Validation

Feature: FR-03 — Forgot Password & Reset

Test Case: TC-FR03-B001

Severity: High

Priority: High

Status: Open

GitHub Issue: #4

Description

The OTP validation does not correctly enforce the required OTP length of 6 digits.

Preconditions

- A registered user exists.
- The forgot-password flow has reached the OTP step.

Steps to Reproduce

1. Navigate to Forgot Password.
2. Submit a registered email.
3. Observe data sent back.

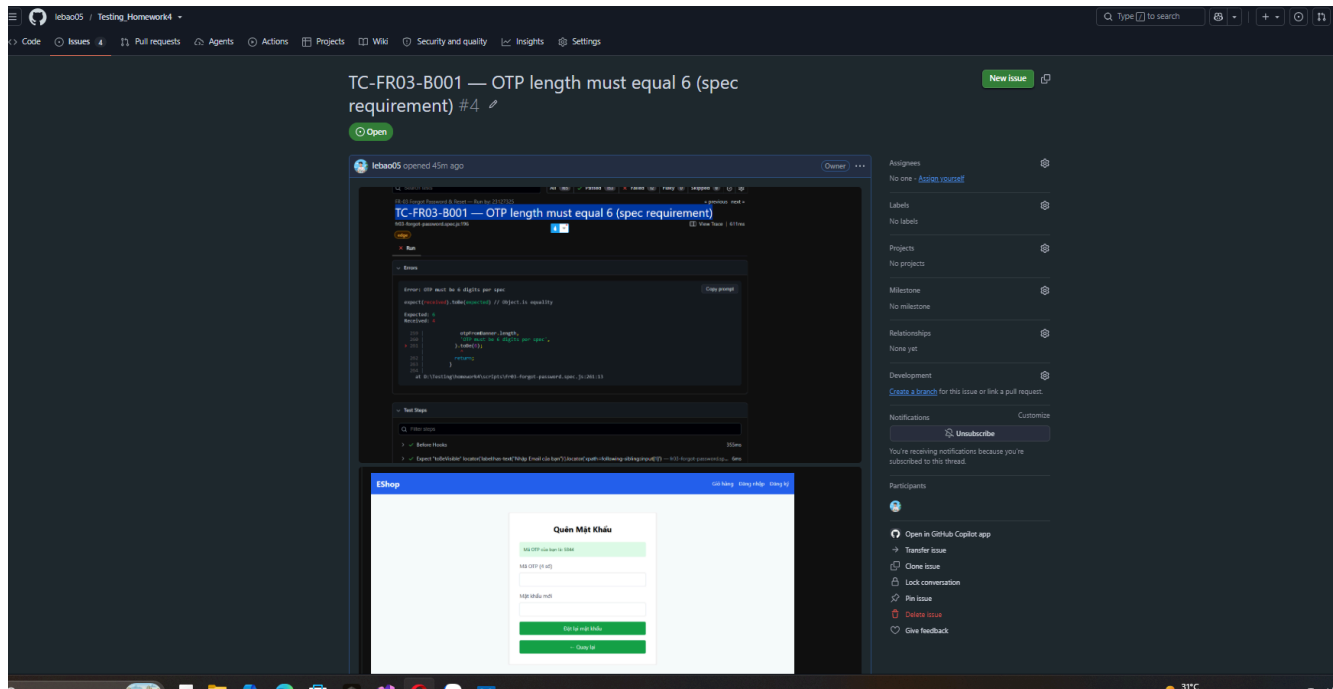

Expected Result

The system send 6-digit OTP.

Actual Result

The system shows 4-digit OTP

Evidence

Impact

Invalid OTP values may be accepted or processed incorrectly.

BUG-FR03-002 — Missing Confirm Password Field

Feature: FR-03 — Forgot Password & Reset

Test Case: TC-FR03-B002

Severity: Medium

Priority: Medium

Status: Open

GitHub Issue: #2

Description

The password-reset step does not expose the required confirm-password input.

Preconditions

- A registered user exists.
- The password-reset step is available.

Steps to Reproduce

4. Open Forgot Password.
5. Enter a registered email.
6. Complete the OTP step.
7. Observe the password-reset form.

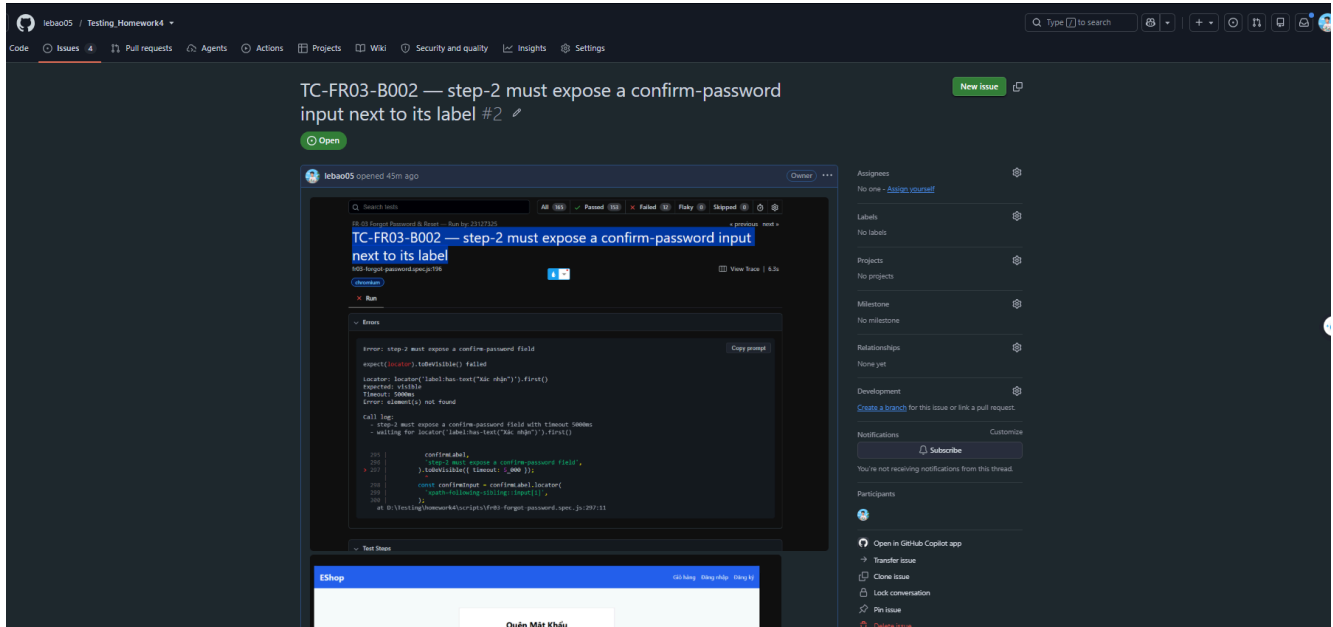

Expected Result

The form should contain New Password and Confirm Password inputs.

Actual Result

The required confirm-password field is missing.

Evidence

Impact

Users cannot explicitly confirm that the new password was entered correctly.

BUG-FR03-003 — Valid Password Rejected

Feature: FR-03 — Forgot Password & Reset

Test Case: TC-FR03-B003

Severity: High

Priority: High

Status: Open

GitHub Issue: #3

Description

A password satisfying the specified requirements, Password1!, is rejected.

Preconditions

- The password-reset step is available.
- A valid reset context exists.

Steps to Reproduce

8. Navigate to password reset.
9. Enter Password1!.
10. Submit the form.

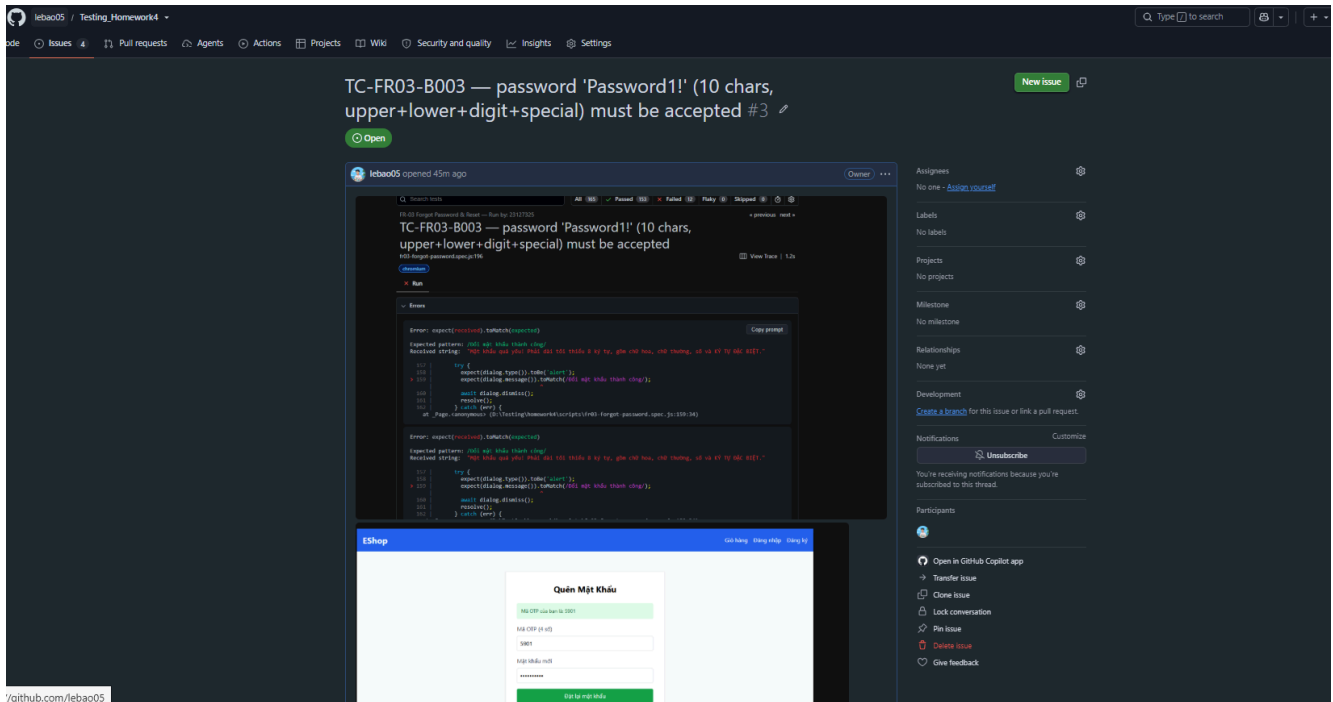

Expected Result

Password1! should be accepted because it has uppercase, lowercase, digit, special character, and 10 characters.

Actual Result

The application rejects the password.

Evidence

Impact

Users with valid passwords may be prevented from completing password reset.

BUG-FR03-004 — Expired Reset Token Accepted

Feature: FR-03 — Forgot Password & Reset

Test Case: TC-FR03-B004

Severity: High

Priority: High

Status: Open

GitHub Issue: #1

Description

An expired password-reset token is not rejected as expected.

Preconditions

- A reset token has been generated.
- The token has exceeded its expected TTL.

Steps to Reproduce

11. Request a reset token.
12. Wait until it exceeds the expected TTL.
13. Use the expired token.

14. Complete the reset request.

Expected Result

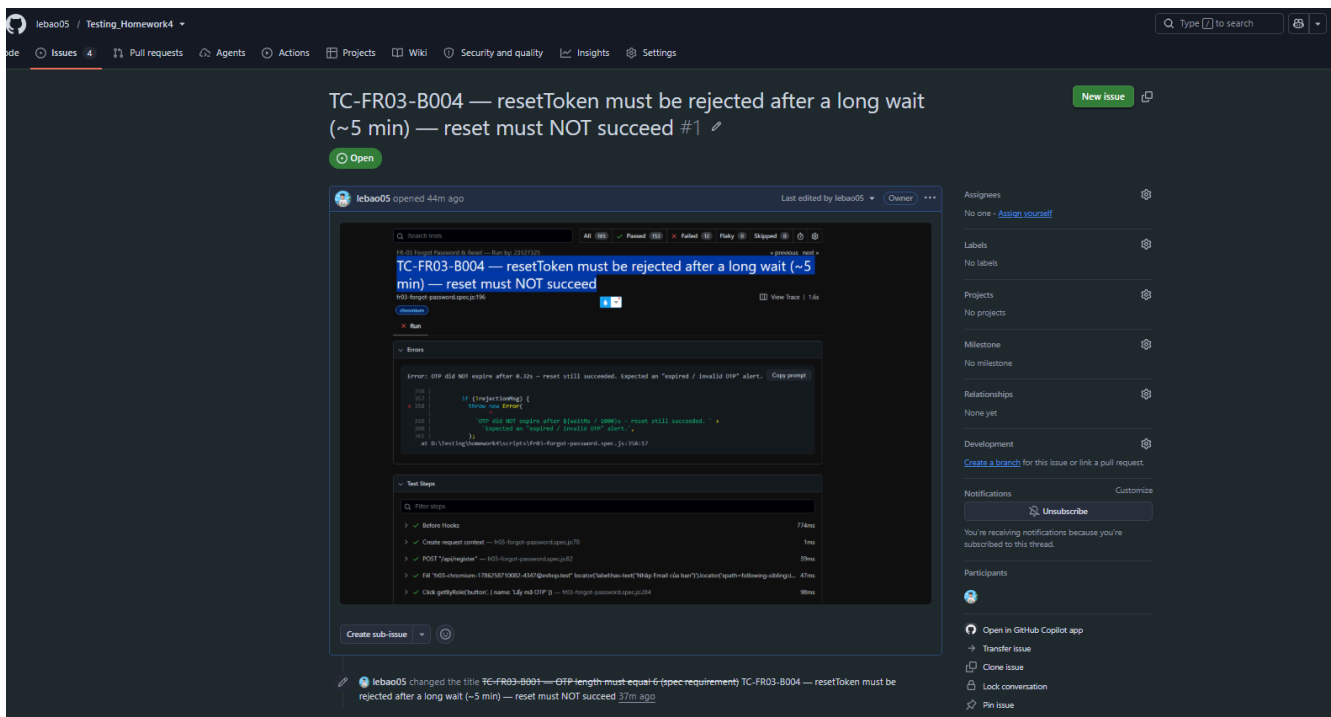

The system should reject the expired token and prevent password reset.

Actual Result

The reset token is not rejected as expected.

Evidence

Insert the corresponding Playwright failure evidence and GitHub Issue screenshot below.

Impact

Accepting expired reset tokens can weaken password-reset security.

2. GitHub Issues Evidence

The automation identified four FR-03 issues. The GitHub repository showed 4 open issues and 0 closed issues at the time of reporting.
